Minecraft Club of America

Anti-Cheat Act Of 2026

Sponsor: Congressman Silky of Ark

02/01/2025 | 003

Statement of Purpose and Findings

Findings:

The Congress finds that the current lack of regulations regarding "item duping" and "x-raying" poses an existential threat to the server economy and fair competition.

Purpose:

To define, prohibit, and establish penalties for cheating and exploiting within the MCA.

Minecraft Club of America

Definitions

X-Raying:

The use of modified clients, texture packs, or glitches to see through solid blocks to locate any ores, structures, or bases.

Duping:

The act of exploiting bugs, glitches, or server mechanics to illicitly create copies of items

Exploiting:

The use of modified clients, or the utilization of any unintended game mechanic or bug, to gain an unfair advantage over other players.

- **Prohibited:** This includes, but is not limited to, Auto-Clickers, Fly-mods, Speed-hacks, Kill-Auras, and any exploit that creates items or bypasses world barriers
- **Exemptions:** Standard client-side "Quality of Life" modifications such as Mini-maps (Xaero's minimap for example), Saturation/Armor HUDs, Shaders, and Performance Mods (e.g., Sodium/Optifine) are not considered exploits under this Act.

Minecraft Club of America

Administrative Hold:

A temporary administrative action that restricts a player's ability to move, interact with the environment, or modify their inventory (Which may consist of a temporary ban for simplicity). It is a protective measure used to preserve evidence and prevent further exploitation while an investigation or World Court proceeding is pending.

Substantive Provisions

Section 1. The Unfair Advantage Test

To determine if a modification or action constitutes "Exploiting," the World Court and Administrative Branch shall apply the following test:

"Does this modification provide the player with information or physical capabilities that a vanilla player could never achieve through standard gameplay or skill?"

- (a) Permitted (Quality of Life): Tools that streamline vanilla actions or display existing vanilla data (e.g., Mouse Tweaks, Saturation/Armor HUDs, Shaders, Performance mods, Litematica holograms for visual reference).
- (b) Prohibited (Exploits): Tools that bypass vanilla limitations (e.g., Free Cam, X-ray, Auto-clickers, Litematica "Printer/Easy Place" functions, Flight, or Movement hacks).

Section 2. Prohibited Acts

Minecraft Club of America

- (a) No member shall engage in X-raying for any purpose.
- (b) No member shall engage in Duping. Any discovery of a "dupe glitch" must be reported to the Administrative Branch immediately.
- (c) No member shall engage in exploiting any unintended game mechanics, bugs, or software vulnerabilities to gain an unfair advantage.
- (d) The distribution of "duped" or "exploited" items is strictly prohibited.

Section 3. Reporting and Investigation

- (a) The Administrative Branch is authorized to use server logs and anti-cheat plugins to identify suspicious behavior.
- (b) Evidence of cheating shall be submitted to the World Court for review. If immediate action is required to protect server stability or the economy, the Administrative Branch may place the player on an Administrative Hold (temporary ban) for a period not to exceed 48 hours, during which a mandatory World Court hearing must commence.

Enforcement and Compliance

First Offense:

Confiscation of all illicit items and distributed illicit assets, plus a temporary ban of 48 hours.

Second Offense:

Permanent ban and forfeiture of any and all personal assets and distributed illicit assets.

Emergency Clause:

The National President may issue an immediate "Administrative Hold" on a player if a mass-dupe is suspected, while an investigation or World Court hearing has commenced or is pending.
